Motto: *Serve, Respect,
Prevent and Protect*

CERT Team Supports MCI Drill

CERT members recently participated in a Mass Casualty Incident (MCI) exercise as part of its ongoing training to prepare emergency responders in the District's MCI procedures. The training conducted at the Greywolf Elementary school, focused on the procedures for triaging, treating and transporting multiple patients.

CERT members volunteered to play the victims, which significantly added to the training's realism. Their participation enabled responders to practice their skills while with real patients. CERT member participation began with an overview of MCI and triage procedures. This was followed with preparation for their roles by getting dressed up with realistic looking injuries and instructions on how to act out the symptoms of their injuries.
